ALG Health Statement On Current Business Operations

BRYAN, OH -

“ALG Health has worked tirelessly since our founding in 2020 to create high-quality, reliable products to keep Ohioans and all Americans safe during the global pandemic.

A recent allegation against ALG Health and its owner Adam Harmon related to our product sourcing does not provide a complete and full picture. We have recently updated our marketing materials to end all confusion and clearly reflect that our products are made in the United States using the best globally-sourced materials.

ALG Health has produced and delivered more than 18 million masks and respirators and we are focused entirely on working with our team of more than 40 employees to make millions of new pieces of personal protective equipment to keep the world safe.”
